

# Lytham Church of England Primary School

## Our intent for our Geography curriculum

At Lytham Church of England Primary School, our aim is for the Geography curriculum to enable our pupils to explore the relationship and interactions between people and the environments in which they live and upon which they and all life on Earth depends. Our pupils will face many geographical opportunities and challenges during their lifetime - at personal, national and global scales. The ability of our children to understand these opportunities and challenges – to embrace and rise to them proactively and with resilience – reflects our intent for their learning throughout the geography curriculum. We will deliver a broad, balanced, inclusive and aspirational Geography curriculum, which will ensure the progressive development of geographical concepts (including mapwork and graphicacy), knowledge and vocabulary. Pupils will be given regular fieldwork opportunities to explore, record, discuss, question and celebrate the awe and wonder in the world around them and further afield. They will learn about climate change, sustainability and migration, and be encouraged to deeply consider the role they play in shaping a more considerate, more knowledgeable, more empathic world.
